

MECH 3620 Spring 26 Final Project Review Scoring Sheet

TEAM NUMBER:

<i>General Aspects</i>	<i>Detailed Items</i>	<i>Score (1-5)</i>
Technical Quality (60%)	Mission & Requirements: Brief recap, MoM, and design parameters	
	Sizing & Weight: Matching chart, MTOW, OEW, payload, and fuel	
	Aerodynamics: Airfoil selection, wing geometry, L/D, and stall speed	
	Configuration & Layout: 3-view drawings and cabin interior layout	
	Propulsion: Engine selection, integration, and thrust/power	
	Weight & Balance: Component breakdown, CG location, and excursion	
	Stability & Control: Static margin, empennage sizing, control surfaces	
	Structures: Structural concept and V-n diagram	
	Landing Gear: Disposition, sizing, and tip-over/rotation lines	
	Performance Verification: Take-off/landing, TTC, range, turnaround time	
	Trade-offs & Refinements: Design iterations, optimizations, and changes	
	Compliance: Meeting constraints (28m span, 35t MTOW, FAR-25, etc.)	
Presentation (20%)	Time Control (20 minutes max)	
	Slides Design & Visual Clarity	
	Clarity of Explanations & Design Rationales	
	Q&A Handling (5 minutes)	
Team Effort (10%)	Distribution of Presentation Time	
	Distribution of Project Knowledge (evident in Q&A)	
Professionalism (10%)	Business Pitch (Persuasiveness)	
	Dress Code (Business casual or formal)	

[] **BONUS: Cost Analysis (DOC, BEP) presented clearly? (Add up to +4 points to total score)**

COMMENTS:
